

BioClark's Fry

A Sustainable Fry Feed for Enhancement Applications

In North America, the Clark name has always been associated with innovation in fish feed, and Bio-Oregon continues the Clark tradition with BioClark's Fry. Natural palatability enhancers maximize feed intake while prime fish meals and fish oils ensure optimal digestibility. BioClark's Fry also achieves better sustainability and price stability with the use of carefully selected and extensively researched alternate raw materials. BioClark's Fry is formulated for salmonids including Pacific Salmon, Steelhead and Trout .

- Natural palatability enhancers promote feed intake and growth
- Prime fish meals and fish oils increase digestibility and improve water quality
- Select use of alternative raw materials provides improved raw material and price stability
- An enhanced vitamin pack ensures all nutritional requirements are fully met
- Advanced manufacturing techniques provide clean and durable pellets with optimal sinking profile

Composition

Feed Size	Protein Min.	Oil Min.	Moisture Max.	Fiber Max.	Ash Max.	DE (MJ/KG)	Fish Size Grams	Fish Size # Fish/lb.
1.2	47%	18%	8.5%	1.0%	13%	18.8	3.0-5.0	150-90
1.5	47%	18%	8.5%	1.0%	13%	18.8	5.0-8.0	90-60
2.0	47%	18%	8.5%	1.0%	13%	18.8	8-18	60-25
2.5	47%	18%	8.5%	1.0%	13%	18.8	18-40	25-11
3.0	47%	18%	8.5%	1.0%	13%	18.8	40-75	11-6

Individual results from the use of Bio-Oregon feed products may vary due to management, environmental, genetic, health and sanitation differences. Therefore, Bio-Oregon does not warrant or guarantee individual results.
